

Communicate with Confidence

A New Employee's Guide to Business Communication · Articulate Rise 360

This storyboard reflects the final, published version of the course, including adjustments made during the build (see notes in the right-hand column). The original pre-build storyboard is included in this repository for comparison.

Audience	New employees / freshers, first 0–3 months on the job
Tool	Articulate Rise 360
Structure	7 outline entries: 4 content lessons, a recap/closing lesson, a graded Quiz, and a Thank You screen
Publish format	Web/HTML5 export, hosted via GitHub Pages
Theme	Apex template · custom teal (#1F6F6B) accent · Auto accessible contrast

Lesson 1: Welcome & Why Communication Matters

Block Type	Final Content	Build Notes
Course Cover	"Communicate with Confidence" — professional office/team photo, teal theme.	Built exactly as planned.
Statement	"Welcome to Your First Week" + first-week hook text about group chats, meetings, and email.	Heading added directly (Statement block supports a separate heading field).
List	4 learning objectives, numbered list style (auto teal markers).	No changes from original plan.
Continue	Standard teal Continue button.	Default styling, no customization needed.

Lesson 2: Writing That Works (Email & Chat)

Block Type	Final Content	Build Notes
Text	"Why Writing Matters" heading + intro paragraph on first impressions.	Built as planned.
Tabs	3 tabs: Email / Chat (Teams/Slack) / Instant Messages, text-only.	Tabs block loaded with Rise's default demo image + placeholder copy; images were manually removed from all 3 tabs to keep the block text-only and on-topic.
Labeled Graphic	5 hotspots (Subject Line, Greeting, Body, Closing, Signature) on a mock email screenshot.	Greeting hotspot copy revised post-preview from a single named example to "Dear Mr./Ms. [Surname]" for broader applicability.
Flashcards	6 cards, alternating Do/Don't, Email etiquette.	Two card backs (shortest text) displayed a larger auto-scaled font than the rest; resolved by lengthening the copy slightly rather than a manual size override, which Rise's Flashcard block doesn't expose.

Knowledge Check	2 multiple-choice questions, ungraded, unlimited attempts.	Answer order adjusted after a QA pass found the correct answer clustering in position 2 across multiple lessons' checks.
------------------------	--	--

Lesson 3: Speaking Up: Meetings & Verbal Communication

Block Type	Final Content	Build Notes
Text	"Showing Up Well in Meetings" heading + intro.	Built as planned.
Process	3 steps — Before / During / After — with a short summary line.	Rise's Process block includes an optional Summary field, used to add a closing reinforcement line not in the original storyboard.
Scenario	"The Disagreement" — 1 decision point, 3 response choices, character-expression changes per choice, closing message.	Built using Rise's native Scenario block (background photo + character), rather than a generic branching structure. Choices A and B route to "Try Again"; the strongest choice (C) routes to Scenario End — reinforcing the best response rather than letting a mediocre pick pass through.
Knowledge Check	1 multiple-choice question on active listening, ungraded, unlimited attempts.	Answer order corrected during the same QA pass as Lesson 2.

Lesson 4: Communicating Remotely

Block Type	Final Content	Build Notes
Text	"Working Well From Anywhere" heading + intro.	Built as planned.
Sorting Activity	Drag-and-drop: 4 workplace situations sorted into "Call/Video (Urgent/Sensitive)" vs. "Email/Chat (Can Wait)."	Replaced the originally planned static Tabs comparison (sync vs. async tools) with this interactive Sorting block instead, to avoid two similar static comparisons back-to-back with Lesson 2.

Statement	Video call etiquette checklist, bolded lead-in phrase in place of a separate heading.	Statement B style used for its teal accent divider; block has no dedicated heading field, so the heading was embedded as bold lead-in text within the body.
Knowledge Check	1 multiple-choice question, ungraded, unlimited attempts.	Answer order corrected in the same QA pass.

Lesson 5: Wrap-Up & Assessment

Block Type	Final Content	Build Notes
Text + Bulleted List	"Key Takeaways" heading (separate Text block) + 4-point recap.	List block has no heading field either, so a short Text block was placed immediately above it. Final bullet rewritten to spell out "real-time" and "written" channels in full, rather than "sync/async," since a recap should stand alone without needing Lesson 4's terminology.
Statement	Closing encouragement message.	Kept in this lesson (before the Quiz) rather than after it — see note below.

Lesson 6: Final Assessment (Quiz)

Rise requires Quiz to be added as its own outline entry (Lesson vs. Quiz is chosen at creation), so the graded assessment sits as a distinct 6th entry rather than nested inside Lesson 5.

Block Type	Final Content	Build Notes
Quiz intro	Short framing text: topics covered, 80% passing score, 2 attempts.	Added ahead of Q1 per Rise's quiz structure.

6 Multiple Choice Qs	One question per core concept: subject lines, tone, meeting prep, active listening, channel choice, meeting follow-up.	Q1 rewritten from a near-duplicate of a Lesson 2 practice question into a fresh scenario testing the same skill. Q2 intentionally left as a close variant, since it tests tone-reading rather than recall. An extra 7th question (a stray/placeholder) was found and removed during preview QA.
Quiz settings	Passing score 80%, 2 retries, Shuffle Answer Choices ON, Randomize Question Order OFF, Timer OFF.	Shuffle enabled specifically to prevent any positional pattern in correct answers, following the same QA finding as the practice checks.

Lesson 7: Thank You

Added after the full preview pass, once it became clear the Quiz results screen (Rise's built-in score display) wasn't a warm closing note on its own. A single Statement block thanks the learner and closes the course, regardless of their quiz outcome.

Note on assessment design: practice Knowledge Checks (Lessons 2–4) are intentionally ungraded with unlimited attempts to support formative learning; the Quiz (Lesson 6) is graded with a limited retry count as the summative check — a deliberate instructional choice rather than a default setting.
