

STORYLINE STORYBOARD

As Built — Final Documentation

Helping Teachers Use Google Classroom for Effective Formative Assessment

18 Slides | Articulate Storyline 360 | July 2026

Instructional Design Portfolio Project

This storyboard reflects the module exactly as built and published. All interactions, triggers, visual design, and instructional design rationale are documented as implemented in the final Articulate Storyline 360 file.

Slide 01 | Welcome & Title Screen

Objective: N/A — Orientation

Objective	N/A — Orientation
On-Screen Text	On-screen title: "Helping Teachers Use Google Classroom for Effective Formative Assessment." Teal oval Start button centred in the lower third. No header bar on this slide.
Voiceover Narration	"Welcome! This module will help you use Google Classroom not just as a file-sharing tool — but as a powerful platform for formative assessment. You will explore real classroom scenarios and practice making instructional decisions. Let's get started."
Visual Design	Navy (#1A2B5F) full-slide background. White title text, Arial 36pt bold. Teal (#0D7377) subtitle text, Arial 32pt. Teal oval Start button centered in the lower third.
Interaction & Triggers	Start button → Jump to Slide 02 when clicked.
Storyline Features	Solid fill background; button trigger.
Instructional Design Rationale	A clean welcome screen signals course quality. The navy/teal palette establishes visual identity from the outset. A single interaction reduces cognitive load (Mayer's Coherence Principle).

→ **Navigation:** Start → Slide 02

Slide 02 | How to Navigate This Module

Objective: N/A — Orientation

Objective	N/A — Orientation
On-Screen Text	Teal header bar. Title: "How to Navigate This Module." Four rounded cards in a 2x2 grid: (1) Continue — Use the Continue button at the bottom to move forward. (2) Slides — This module has 18 slides covering real classroom scenarios. (3) Interactions — Follow on-screen prompts before moving forward. (4) Time — This module takes approximately 30 minutes. Continue button centered at the bottom.
Voiceover Narration	"Before we begin, here is a quick guide. Use the Continue button at the bottom of each slide to move forward. Some slides are interactive — follow the on-screen prompts. This module has 18 slides and takes approximately 30 minutes."
Visual Design	Light grey (#F2F4F7) background. Teal header bar with white module title (reused on all content slides). Four white rounded-rectangle cards with teal borders in a 2x2 grid. Teal bold card titles with navy body text. Teal Continue button.
Interaction & Triggers	Continue button → Jump to Slide 03.
Storyline Features	Button trigger; teal header bar (reused on all content slides).
Instructional Design Rationale	Orientation content reduces extraneous cognitive load (Cognitive Load Theory). Learners who understand the navigation model engage more confidently with interactive content later in the course.

→ **Navigation:** Continue → Slide 03

Slide 03 | Meet Ms. Priya — A Classroom Story

Objective: N/A — Narrative hook

Objective	N/A — Narrative hook
On-Screen Text	Teal header bar. Title: "Meet Ms. Priya." Left side: introductory text about Ms. Priya. Right side: Marilyn character (concerned expression, holding a notebook), grounded at the bottom of the slide, with a speech bubble reading: "I spent my entire Sunday marking notebooks. By the time I returned them, the class had already moved on." Continue button.
Voiceover Narration	"Meet Ms. Priya. She teaches Grade 7 Science at a busy urban school. Every weekend she takes home stacks of notebooks to check for understanding — but by Monday, the class has already moved forward. Sound familiar? This module will show you a better way."
Visual Design	Marilyn (Content Library, illustrated, blue top, black trousers) positioned on the right, feet grounded at the slide bottom. White speech bubble with teal border pointing toward her. Body text in Arial 16pt navy on the left side.
Interaction & Triggers	Continue button → Jump to Slide 04.
Storyline Features	Content Library character (Marilyn); speech-bubble callout shape; button trigger.
Instructional Design Rationale	The narrative hook creates emotional relevance and activates prior experience (Knowles — adult learning anchored in real problems). Ms. Priya serves as the protagonist throughout the module.

→ *Navigation: Continue* → Slide 04

Slide 04 | Learning Objectives

Objective: All objectives — preview

Objective	All objectives — preview
On-Screen Text	Teal header bar. Title: "Learning Objectives." Teal subheading: "By the end of this module, you will be able to:" followed by seven bullet points. Marilyn (confident, arms-crossed expression), smaller scale, on the right side. Continue button.
Voiceover Narration	"Here is what you will be able to do by the time you complete this module. Each objective connects directly to real actions you can take in your classroom this week."
Visual Design	Light grey background. Objectives list on the left two-thirds, Arial 15pt navy with bullet points. Marilyn (smaller scale, confident arms-crossed pose) on the right side. Teal Continue button centered at the bottom.
Interaction & Triggers	Continue button → Jump to Slide 05.
Storyline Features	Content Library character (different expression from Slide 03); button trigger.
Instructional Design Rationale	Explicitly stating objectives activates schema and sets learner expectations (Gagné — Inform the Learner of Objectives). The character's continued presence maintains narrative continuity across slides.

→ Navigation: Continue → Slide 05

Slide 05 | What Is Formative Assessment?

Objective: Objective 1 — Explain formative assessment

Objective	Objective 1 — Explain formative assessment
On-Screen Text	Teal header bar. Title: "What Is Formative Assessment?" Two side-by-side white cards with teal borders: left card presents the definition; right card explains why it matters. Light teal reflection box at the bottom: "Think about it: When did you last know a student was lost before the test?" Continue button.
Voiceover Narration	"Formative assessment is any activity that gives you information about learning while it is still happening. It is not about grades — it is about guiding your next step."
Visual Design	Light grey background. Two white rounded cards side by side with teal borders. Light teal (#E0F4F4) reflection-prompt box, full width, at the bottom. Arial 15pt navy body text.
Interaction & Triggers	Continue button → Jump to Slide 06. The reflection box is display only.
Storyline Features	Rectangle shapes; card design; button trigger.
Instructional Design Rationale	The two-card layout separates definition from application (Mayer's Segmenting Principle). The reflection prompt activates prior knowledge without introducing grading pressure (constructivism; adult autonomy).

→ Navigation: Continue → Slide 06 → Continue → Slide 07

Slide 06 | Formative vs. Summative Assessment + Slide 07 | Review

Objective: Objective 2 — Differentiate formative and summative assessment

Objective	Objective 2 — Differentiate formative and summative assessment
On-Screen Text	Teal header bar. Title: "Formative vs. Summative Assessment." Italic instruction: "Click each card to see whether it belongs to Formative or Summative." Two column headers: Formative (teal) on the left, Summative (navy) on the right. Four statement cards in the center column: "Given during learning" "Helps guide next steps" "Given at the end of a unit" "Used for final grades." Continue button.
Voiceover Narration	"Let's explore the difference between formative and summative assessment. Click each statement card to reveal which category it belongs to."
Visual Design	Light grey background. Teal and navy column-header rectangles. Four white rounded cards with teal borders in the center column. Cards change color on click: teal indicates Formative, navy indicates Summative.
Interaction & Triggers	Card 1 ("Given during learning") → Correct state (teal) on click. Card 2 ("Helps guide next steps") → Visited state (teal) on click. Card 3 ("Given at the end of a unit") → Selected state (navy) on click. Card 4 ("Used for final grades") → Drop Correct state (navy) on click. The Continue button remains active throughout.

Storyline Features	States (custom and built-in); change-state triggers on each card.
Instructional Design Rationale	Active sorting reinforces conceptual differentiation (Active Learning). Click-to-reveal is used as a trial-version alternative to drag-and-drop. Immediate visual feedback reduces cognitive load (Sweller, Cognitive Load Theory).

→ *Navigation: Continue* → *Slide 08*

Slide 08 | Explore Google Classroom Features

Objective: Objective 3 — Select the appropriate feature

Objective	Objective 3 — Select the appropriate feature
On-Screen Text	Teal header bar. Title: "Explore Google Classroom Features." Italic instruction: "Click each feature to learn how it supports formative assessment. Explore all 5 before continuing." Five teal buttons: Question Quiz Assignment Google Forms Comment Bank Student Responses. Each button opens a layer containing a feature information card and a Close button. Continue button.
Voiceover Narration	"Google Classroom has several features designed specifically for formative assessment. Explore each one by clicking the buttons."
Visual Design	Light grey background. Five equal-width teal buttons in a row. Each layer: white rectangle with teal border, bold navy title, navy body text, and a teal Close button centered over the base slide.
Interaction & Triggers	Five layers (Question, Quiz Assignment, Google Forms, Comment Bank, Student Responses). Each feature button → Show corresponding layer. Close button → Hide layer. Continue → Jump to Slide 08.
Storyline Features	Layers (5); Show/Hide layer triggers.
Instructional Design Rationale	The exploratory menu gives learners control over sequence (adult autonomy). All five features are explored before the practice scenarios, building the schema needed for later decision-making.

→ *Navigation: Continue* → *Slide 09*

Slide 09 | Feature Deep Dive: The Question Tool

Objective: Objective 3 — Select the appropriate feature

Objective	Objective 3 — Select the appropriate feature
On-Screen Text	Teal header bar. Title: "The Question Tool." Left panel (light grey card): "What It Does" with four bullet points. Right panel (light teal card): "Ms. Priya's Situation," presenting the feature in scenario context. Marilyn character on the right side. Continue button.
Voiceover Narration	"The Question tool is your go-to for a quick pulse check. You can post a short-answer or multiple-choice question instantly. Students respond directly in Google Classroom, and you see all responses on one screen."

Visual Design	Light grey background. Two rounded cards side by side: left panel light grey (#F2F4F7), right panel light teal (#E0F4F4) with a teal border. Marilyn appears at a small scale, far right. Arial 14pt navy body text.
Interaction & Triggers	Continue button → Jump to Slide 09.
Storyline Features	Two-panel card layout; Content Library character; button trigger.
Instructional Design Rationale	Connecting the feature to Ms. Priya's real situation demonstrates practical application rather than theory alone (situated cognition; Merrill's First Principles of Instruction).

→ Navigation: Continue → Slide 10

Slide 10 | Guided Demo: Create a Question Activity

Objective: Objective 4 — Create a Question activity

Objective	Objective 4 — Create a Question activity
On-Screen Text	Teal header bar. Title: "How to Create a Question Activity." Step counter, top right: "Step 1 of 5." Central rounded card containing the step instruction. Marilyn, seated at a desk with a computer (Content Library), positioned in the left/center area. Next Step button, bottom right. Steps 2–5 appear on separate layers, each with an updated step counter, instruction card, and Next/Previous buttons.
Voiceover Narration	"Now let's walk through creating a Question activity together. Follow each step." (Each of the five steps has a corresponding voiceover script.)
Visual Design	Light grey background. Marilyn, seated at a desk (Content Library), establishes simulation context. Single rounded card, center-right, grey fill with teal border. Teal step-counter badge, top right. Teal Next Step button, bottom right. Previous button, bottom left, appears on layers 2–5.
Interaction & Triggers	Base layer = Step 1. Layers: Step 2, Step 3, Step 4, Step 5. Next Step button → Show next layer. Previous button → Hide current layer. Step 5 Continue button → Jump to Slide 10.
Storyline Features	Content Library character (seated-at-desk pose); layers (4); Show/Hide layer triggers.
Instructional Design Rationale	Marilyn at the computer adds visual authenticity to the simulation. The five-step guided walkthrough builds procedural knowledge (Merrill's First Principles). The Previous button supports learner control and review.

→ Navigation: Step 5 Continue → Slide 11

Slide 11 | Guided Demo: Create a Quiz Assignment

Objective: Objective 5 — Create a Quiz Assignment

Objective	Objective 5 — Create a Quiz Assignment
On-Screen Text	Identical structure to Slide 09. Title: "How to Create a Quiz Assignment." Step 1 of 5 through Step 5 of 5, with Quiz Assignment–specific instructions. Marilyn appears at the desk with a computer in the same position.

Voiceover Narration	"A Quiz Assignment links Google Forms to Google Classroom — giving you auto-graded results. Let's create one together." (Each step has a corresponding voiceover.)
Visual Design	Identical to Slide 09. Marilyn at the desk, same pose. Same card, step counter, and button design, with content updated for the Quiz Assignment workflow.
Interaction & Triggers	Duplicate of the Slide 09 structure; all layer triggers identical. Step 5 Continue button → Jump to Slide 11.
Storyline Features	Content Library character (same seated pose); layers (4); Show/Hide layer triggers — duplicated from Slide 09.
Instructional Design Rationale	Repeating the mechanic with new content reduces cognitive load through familiarity (Cognitive Load Theory — schema automation). Marilyn at the desk reinforces context consistently across both demos.

→ Navigation: Step 5 Continue → Slide 12

Slide 12 | Scenario 1: Fractions Check

Objective: Objective 3 — Select the appropriate feature

Objective	Objective 3 — Select the appropriate feature
On-Screen Text	Teal header bar. Title: "Which Tool Would You Choose?" Italic instruction. Light teal scenario card: "Ms. Priya has just finished teaching fractions. She has 5 minutes before the bell. What should she use?" Four teal answer buttons: Question Tool Quiz Assignment Google Forms Comment Bank.
Voiceover Narration	"Time to practice on your own. Read the scenario and choose the most appropriate Google Classroom feature."
Visual Design	Light grey background. Wide light teal scenario card with teal border. Four equal teal buttons in a row. Correct layer: teal card with white text. Incorrect layer: amber card with white text. A Next Scenario button appears on each feedback layer.
Interaction & Triggers	Question Tool → Show Correct_S1 layer (teal). The other three options → Show Incorrect_S1 layer (amber). Both Next Scenario buttons → Jump to Slide 12.
Storyline Features	Layers (Correct_S1, Incorrect_S1); Show layer triggers; Jump to Slide trigger on feedback layers.
Instructional Design Rationale	Scenario practice applies knowledge in context (situated cognition). Explanatory feedback for incorrect answers is more instructive than a generic "try again" prompt (Mayer). Correct answer: Question Tool.

→ Navigation: Next Scenario (both layers) → Slide 13

Slide 13 | Scenario 2: Group Project Reflection

Objective: Objective 3 — Select the appropriate feature

Objective	Objective 3 — Select the appropriate feature
-----------	--

On-Screen Text	Identical layout to Slide 11. Scenario: "Ms. Priya wants detailed written reflections from students on their group project experience." Four answer buttons.
Voiceover Narration	"Ms. Priya needs detailed written responses from every student. Which tool gives her that flexibility?"
Visual Design	Identical to Slide 11. Correct layer teal; incorrect layer amber.
Interaction & Triggers	Google Forms → Show Correct_S2 layer. The other options → Show Incorrect_S2 layer. Both Next Scenario buttons → Jump to Slide 13.
Storyline Features	Layers (Correct_S2, Incorrect_S2) — duplicated from Slide 11.
Instructional Design Rationale	The second scenario tests a different decision. Correct answer: Google Forms. Builds discrimination between tools (Gagné — discriminating among stimuli).

→ *Navigation: Next Scenario (both layers) → Slide 14*

Slide 14 | Scenario 3: Weekly Comments

Objective: Objective 3 — Select the appropriate feature

Objective	Objective 3 — Select the appropriate feature
On-Screen Text	Identical layout to Slides 11–12. Scenario: "Ms. Priya types the same feedback phrases repeatedly every week and wants a more efficient solution." Four answer buttons.
Voiceover Narration	"Ms. Priya is spending too long typing the same feedback phrases. Which feature solves this most efficiently?"
Visual Design	Identical to Slides 11–12.
Interaction & Triggers	Comment Bank → Show Correct_S3 layer. The other options → Show Incorrect_S3 layer. Both Next Scenario buttons → Jump to Slide 14.
Storyline Features	Layers (Correct_S3, Incorrect_S3) — duplicated from Slide 12.
Instructional Design Rationale	Comment Bank is a less obvious feature choice. This scenario tests the learner's ability to match an efficiency need to the correct tool. Correct answer: Comment Bank.

→ *Navigation: Next Scenario (both layers) → Slide 15*

Slide 15 | Scenario 4: Auto-Graded Test

Objective: Objective 3 — Select the appropriate feature

Objective	Objective 3 — Select the appropriate feature
On-Screen Text	Identical layout to Slides 11–13. Scenario: "Ms. Priya wants a 10-question multiple-choice test, auto-graded instantly." Four answer buttons. A Continue button (rather than Next Scenario) appears on the feedback layers, as this is the final scenario.
Voiceover Narration	"For our final scenario — Ms. Priya needs auto-graded scores immediately after submission. Which tool is built specifically for that?"

Visual Design	Identical to the previous scenario slides. Continue button appears on both feedback layers.
Interaction & Triggers	Quiz Assignment → Show Correct_S4 layer. The other options → Show Incorrect_S4 layer. Both Continue buttons → Jump to Slide 15.
Storyline Features	Layers (Correct_S4, Incorrect_S4) — duplicated from Slide 13; button label updated to Continue.
Instructional Design Rationale	Completes the scenario sequence. The learner has now practiced selecting all four main features in realistic contexts. Correct answer: Quiz Assignment.

→ *Navigation: Continue (both layers) → Slide 16*

Slide 16 | Role-Play: Reviewing Student Responses

Objective: Objectives 6 & 7 — Review responses; provide feedback

Objective	Objectives 6 & 7 — Review responses; provide feedback
On-Screen Text	Teal header bar. Title: "Review Student Responses." Context text box: "Ms. Priya posted: 'Name one thing a plant needs for photosynthesis.' Here are 3 student responses. Review Student B's answer and choose the best feedback." Three student response cards, with Student B's card shown in a thicker border. Three teal feedback decision buttons: "Good job!" "That's wrong, see me after class." "You got water right — now think about what else a plant takes in from its leaves and the air."
Voiceover Narration	"Now you are in Ms. Priya's shoes. Read the student responses and decide what feedback to give Student B. Different choices lead to different outcomes."
Visual Design	Light grey background. Three equal student response cards in a row. Student B's card has a thicker teal border (3pt). Three wide teal buttons below the cards. Branch layers: white card with teal border displaying the consequence text. Next button, bottom right, on each layer.
Interaction & Triggers	"Good job!" → Show Branch_Generic layer. "That's wrong..." → Show Branch_Harsh layer. "You got water right..." → Show Branch_Specific layer. All Next buttons → Jump to Slide 16. Hide Other Layers is enabled on all branch layers.
Storyline Features	Layers (Branch_Generic, Branch_Harsh, Branch_Specific); Show layer triggers; Hide Other Layers.
Instructional Design Rationale	Role-play builds empathy and applied decision-making (authentic practice). Branching consequences make choices feel real. The three outcomes demonstrate that feedback quality has a measurable impact on student learning.

→ *Navigation: Next (all branch layers) → Slide 17*

Slide 17 | Final Challenge: Your Mission

Objective: All objectives — synthesis

Objective	All objectives — synthesis
------------------	----------------------------

On-Screen Text	Navy background. White header box: "Your Mission." Teal mission statement: "It is 8 PM. You have 20 minutes before tomorrow's lesson needs a formative check. Design a complete formative assessment plan." Step 1 of 3: four goal buttons. Step 2 layer: four tool buttons. Step 3 layer: three feedback-strategy buttons. MissionComplete layer: teal card displaying the ideal combination.
Voiceover Narration	"This is your final challenge. Design a formative assessment for a real classroom scenario — making the same decisions a teacher would make."
Visual Design	Navy background on all layers. White "Your Mission" header box. Teal mission-statement box. Teal step counter, top right. Teal buttons for all choices. Mission Complete: large teal card with white text showing the ideal answer combination.
Interaction & Triggers	Step 1: any of the four goal buttons → Show Step2_Tool layer. Step 2: any of the four tool buttons → Show Step3_Feedback layer. Step 3: any of the three feedback buttons → Show Mission Complete layer. Continue → Jump to Slide 17. Hide Other Layers is enabled throughout.
Storyline Features	Layers (Step2_Tool, Step3_Feedback, Mission Complete); Show layer triggers; Hide Other Layers.
Instructional Design Rationale	The synthesis task requires applying all objectives together (Bloom's Apply/Analyze). All paths lead to the same Mission Complete layer (a trial-version simplification). The ideal combination is revealed for self-reflection rather than automated, personalized scoring.

→ *Navigation: Continue (Mission Complete) → Slide 18*

Slide 18 | Key Takeaways

Objective: All objectives — consolidation

Objective	All objectives — consolidation
On-Screen Text	Teal header bar. Title: "5 Key Takeaways." Italic instruction: "Click each card to reveal a key lesson." Five teal cards in a 2+3 grid: (1) Formative = During Learning (2) 5 Tools Available (3) Match Tool to Goal (4) Feedback = Specific & Timely (5) Responses Tell You What to Teach Next. Cards turn navy when clicked, revealing tip text. Continue button, bottom right.
Voiceover Narration	"Before you go, here are the five most important ideas from this module. Click each card and think about how you might apply it in your next lesson."
Visual Design	Light grey background. Five teal cards in a 2+3 grid. Normal state: teal fill, white bold title. Visited state: navy fill, white title plus tip text. Italic instruction appears below the slide title.
Interaction & Triggers	Each card → Change state to Visited on click. Continue → Jump to Slide 18.
Storyline Features	States (Normal/Visited on five cards); change-state triggers; button trigger.
Instructional Design Rationale	Spaced review of key points supports retention (desirable difficulties, Bjork). Click-to-reveal requires active engagement with each takeaway rather than passive reading.

→ *Navigation: Continue → Slide 19*

Slide 19 | Course Complete**Objective:** All objectives — reflection and closure

Objective	All objectives — reflection and closure
On-Screen Text	Navy background. Teal banner: "Congratulations!" White box with the completion message. White reflection card: "Before you go — which Google Classroom feature will you try first in your next lesson?" Text-entry input box. Teal Finish button, bottom center.
Voiceover Narration	"Congratulations — you have completed this module. You now have the knowledge and tools to use Google Classroom for formative assessment. Before you go, take sixty seconds to reflect: which feature will you try first?"
Visual Design	Navy background matches Slides 01 and 16, bookending the module visually. Teal "Congratulations" banner. White completion-message box. White reflection card. Text-entry input box. Teal Finish button.
Interaction & Triggers	Text entry: learner types a reflection (display only). Finish button → Exit course trigger.
Storyline Features	Text-entry input; Exit course trigger.
Instructional Design Rationale	The closing reflection consolidates learning and creates personal commitment (Kirkpatrick Level 1–2 bridge). The Exit course trigger provides clean closure. The navy background bookends the module, creating visual coherence with Slide 01.

→ *Navigation: Finish → Exit course*
